

## Louder than Words

Arnold Schoenberg has become an American citizen.

Perhaps the most famous man on the faculty, Schoenberg now has his final citizenship papers. He has come to America because he sought intellectual and creative freedom. America has welcomed him and considers herself privileged to have him become an American.

There exists no better reminder of the brutality of the New Order in Europe than the many famous refugees who have left their homeland—some by force, some by choice—to come to a country where they can live and work in freedom and security.

For the fantastic racial theories and the cruel political practices of the Nazis work at cross purposes with the men whose hearts and brains desire to create, to discover, to do great things.

Arnold Schoenberg is now an American citizen.

Let us not forget, in our good fortune, to send condolences to Germany for her loss. Though America profits by the loss, we still can extend a pitying glance at any nation which is insane enough willfully to impoverish itself by depleting its cultural assets.
